POLYRAD®XT

Making Your Cable Connection

General Cable, with years of industry expertise, provides the toughest cables to meet the most extreme requirements for long-term performance and reliability for rapid transit, locomotive applications, trackside and off-road equipment. Our unique Polyrad®XT single conductor product line of 110°C/125°C rated 600V and 2000V constructions offer an excellent overall balance of properties unattainable with conventional insulating systems. **General Cable is a preferred source for the development of new cabling technology.**

Polyrad®XT

Product Features & Benefits

- 110°C/125°C temperature rating for long-life, higher ampacities and protection from thermal overloads
- Maximum flame-retardant as demonstrated by UL VW-1 IEEE 383 & IEEE 1202
- Excellent oil- and chemical- resistance
- Exceptional reliability and mechanical performance
- Simplified installations made possible by smaller outside diameters, flexible stranding and insulation

Comprehensive Quality Programs

- ISO 9001 Registered
- Meets AAR RP-585
- Statistical Process Controls (SPC)
- Total Quality Management (TQM)

Products/Applications

- Polyrad®XT Single Conductor Car Wire
- Diesel-Electric Locomotive Power Cable (DLO)
- Trackside Cables
- Coupler Cables
- Multi-Conductor Shielded Cables
- *Others constructions available upon request
